ELSEVIER

Journal of Statistical Planning and Inference 63 (1997) 387–388

journal of statistical planning and inference

Author Index Volume 63 (1997)*

Adke, S.R. and T.V. Ramanathan, On optimal prediction for stochastic processes (1) 1– 7
Ahsanullah, M., *see* P.J. Szablowski (2) 377–385
Arnold, B.C., Characterizations involving conditional specification (2) 117–131
Barndorff-Nielsen, O.E. and P.E. Jupp, Yokes and symplectic structures (2) 133–146
Bondesson, L., A generalization of Poincaré's characterization of exponential families (2) 147–155
Bose, A. and B. Boukai, Sequential estimation of the mean of NEF-PVF distributions (1) 55– 70
Boukai, B., *see* A. Bose (1) 55– 70
Cacoullos, T. and V. Papathanasiou, Characterizations of distributions by generalizations of variance bounds and simple proofs of the CLT (2) 157–171
Chaganty, N.R., An alternative approach to the analysis of longitudinal data via generalized estimating equations (1) 39– 54
Coad, D.S. and M.B. Woodroofe, Approximate confidence intervals after a sequential clinical trial comparing two exponential survival curves with censoring (1) 79– 96
Fedorov, V.V., *see* G. Montepiedra (1) 97–111
Fosam, E.B. and D.N. Shanbhag, An extended Laha–Lukacs characterization result based on a regression property (2) 173–186
Gupta, A.K., T.T. Nguyen and W.-B. Zeng, Characterization of multivariate distributions through a functional equation of their characteristic functions (2) 187–201
Gupta, R.D. and D. St. P. Richards, Invariance properties of some classical tests for exponentiality (2) 203–213
Hallin, M., *see* M. Seoh (1) 19– 38
Heyde, C.C., *see* Y.-X. Lin (2) 255–264
Ho, A., *see* K.-S. Lau (2) 231–246
Jupp, P.E., *see* O.E. Barndorff-Nielsen (2) 133–146
Kagan, A. and V. Rohatgi, A class of random polynomials with an invariance property (2) 215–222
Kalamkar, V.A., *see* M. Sreehari (2) 363–375
Kemp, A.W., Characterizations of a discrete normal distribution (2) 223–229
Lau, K.-S. and A. Ho, On the discount sum of Bernoulli random variables (2) 231–246
Letac, G., The retrieval of a rotation invariant distribution of (X, Y) from $\mathbb{E}(X^2|Y)$ (2) 247–253
Lim, W.K., *see* N. Pal (1) 71– 78
Lin, Y.-X. and C.C. Heyde, On spaces of estimating functions (2) 255–264
McKenzie, E., Simulation of a stationary autoregression: A characterization of the normal distribution (2) 265–270
Montepiedra, G. and V.V. Fedorov, Minimum bias designs with constraints (1) 97–111
Nagaraja, H.N. and V.B. Nevzorov, On characterizations based on record values and order statistics (2) 271–284
Nevzorov, V.B., *see* H.N. Nagaraja (2) 271–284
Nguyen, T.T., *see* A.K. Gupta (2) 187–201
Pakes, A.G., Characterization by invariance under length-biasing and random scaling (2) 285–310
Pal, N. and W.K. Lim, A note on second-order admissibility of the Graybill–Deal estimator of a common mean of several normal populations (1) 71– 78
Papathanasiou, V., *see* T. Cacoullos (2) 157–171
Patil, G.P., A.K. Sinha and C. Taillie, Ranked set sampling, coherent rankings and size-biased permutations (2) 311–324
